

The Future of Aesthetics is Here

Advanced Dectro Technology Live Demonstration Course

10-Hour Live Continuing Education for Florida Electrologists

Course Description

Join us for an exclusive hands-on continuing education experience featuring the world's most advanced electrolysis technology from Dectro International. This intensive 10-hour live course is designed for Florida electrologists who have completed their initial 10 hours of continuing education online through www.bhiceu.com and are ready to elevate their practice with state-of-the-art equipment training. You'll witness extensive live demonstrations and client treatments using the revolutionary Dectro Senior 3G with its 13.56 MHz precision technology and 1080 pre-programmed settings, plus the ultrafast Apilus xCell Pur with groundbreaking 27.12 MHz frequency (six times faster than conventional devices) and intelligent treatment parameter assistance. Beyond cutting-edge machines, we'll explore Dectro's ergonomically-validated furniture systems, including the clinically-proven PosiFlex elbow supports that reduce practitioner muscle stress by 50%, ensuring both optimal client comfort and career longevity for electrologists. This live format allows for real-time interaction, immediate question resolution, and the opportunity to observe actual treatments demonstrating the superior comfort, speed, and precision these advanced systems provide. Participants will gain invaluable insights into how premium equipment transforms both treatment outcomes and business success, while fulfilling their Florida continuing education requirements. Upon completion, you'll possess the knowledge to make informed equipment investments that position your practice at the forefront of modern electrolysis technology.

10-Hour Course Schedule

Hour 1: Course Introduction & Florida CE Requirements Overview

- Welcome and introductions
- Florida continuing education compliance review
- Overview of course objectives and live demonstration format
- Introduction to Dectro International's technology evolution
- Q&A session setup for interactive learning

Hour 2: Dectro Senior 3G Deep Dive - Foundation Technology

- Advanced 13.56 MHz radiofrequency technology explained
- Exploration of 1080 pre-programmed settings by modality and hair type
- iMM-Pac technology package and Processor Sentinel protection
- MultiPlex and MultiBlend exclusive modalities demonstration
- Automatic tolerance testing for enhanced client comfort

Hour 3: Live Client Demonstration - Senior 3G in Action

- Real client treatment session using Senior 3G
- Variable impedance adaptation technology in practice
- Modality selection based on hair type and body area
- Demonstrating thermolysis vs. blend methods
- Client comfort assessment and technique refinement

Hour 4: Advanced Senior 3G Techniques & Multiple Modalities

- Deep dive into the 9 distinct modalities (Flash, MicroFlash, OmniBlend)
- Advanced programming and customization of the 60 user programs
- Multiple live client demonstrations showcasing different modalities
- Comparing treatment outcomes across various hair types and body areas
- Mastering the automatic tolerance testing system for optimal comfort

Hour 5: Revolutionary xCell Technology - Speed Meets Precision

- Understanding 27.12 MHz ultrafast frequency (6x faster than conventional)
- Apilus xCell Pur special edition features and capabilities
- Patented Synchro method for challenging hair removal
- APIL (Artificial Pro•Tec Intelligence Levels) intelligent assistance system
- Progressive galvanic current with hydration compensation

Hour 6: Live Client Demonstration - xCell Pur Advanced Treatments

- Live treatment showcasing ultrafast technology benefits

- Intelligent treatment parameter selection system demonstration
- Comparing treatment speeds and client comfort levels
- Millisecond precision treatments in real-time
- Advanced technique demonstrations for distorted follicles

Hour 7: Advanced xCell Pur Techniques & Extended Live Demonstrations

- Multiple client treatments demonstrating various skin and hair types
- Mastering the intelligent 22 body area matrix system
- Advanced Synchro method techniques for challenging cases
- Speed vs. comfort optimization strategies
- Comparative analysis between Senior 3G and xCell Pur performance

Hour 8: Ergonomic Excellence - Dectro Furniture Systems for Career Longevity

- Evidence-based ergonomic design principles
- PosiFlex elbow support system - 50% muscle stress reduction
- Capella and Astra treatment chair features and adjustments
- Telesta ergonomic stool benefits for practitioner health
- Preventing musculoskeletal disorders in electrolysis practice

Hour 9: Professional Presentation & Business Impact

- Equipment selection as strategic business investment
- Client confidence building through premium equipment presentation
- ROI analysis for advanced technology adoption
- Competitive advantages in modern electrolysis markets
- Warranty coverage and long-term investment protection

Hour 10: Hands-On Experience & Course Wrap-Up

- Participant hands-on equipment exploration (supervised)
- Individual questions and advanced technique discussions
- Equipment comparison and selection guidance
- Course evaluation and continuing education certificate presentation
- Resources for ongoing education and Beauty and Health Institute support

Course Format: Live Interactive Online via Zoom

Prerequisites: Completion of 10 hours online CE through www.bhiceu.com

Certificate: Official Florida CE completion certificate provided

Includes: Live demonstrations, interactive Q&A, and ongoing resource access
